CobbLinc

## Regional Peers

### Typical Features

- Trip Planning
- Regional Feeds Integrated
- Real-Time Transit Tracking
- Mobile Ticketing

### APP NAMES

#### **Dallas Area Rapid Transit**

*Dallas, TX*

Developer: DoubleMap

**GoPass**

#### **Jacksonville Transportation Authority**

*Jacksonville, FL*

Developer: Passport

**MyJTA**

#### **Washington Metropolitan Area Transportation Authority**

*District of Columbia*

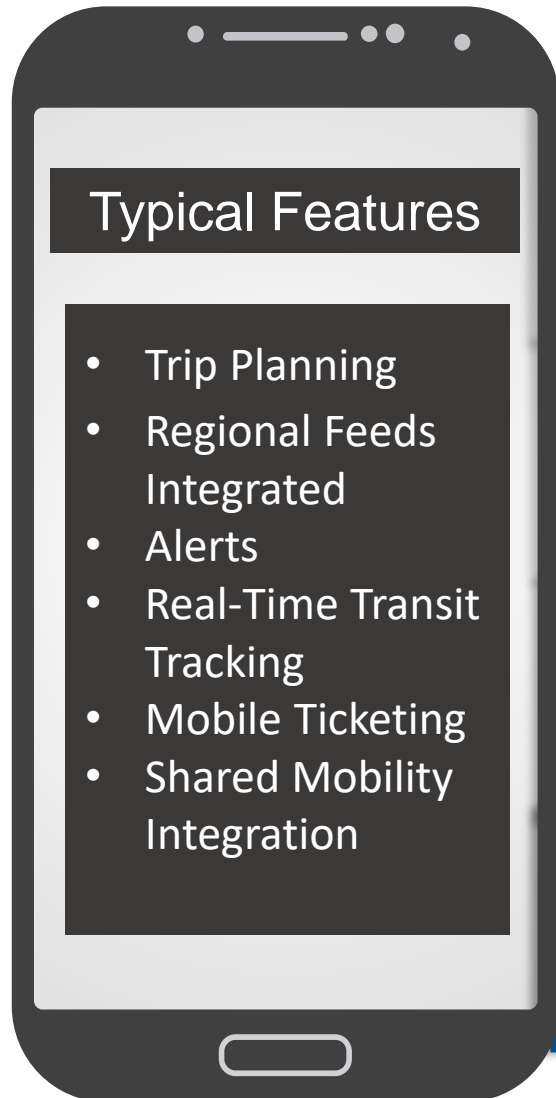

Developer: Dixon Mobility

**DC Metro  
and Bus**

# National and International Peers

## APP NAMES

**Regional Transit District**  
*Denver, CO*

Transit App  
RTD Mobile Tickets  
NextRide  
RTD Transit Watch  
Moovit

**San Francisco Municipal  
Transportation Agency**  
*San Francisco, CA*

**Transit App  
MuniMobile**

***Transport for London***  
*London, United Kingdom*

City Mapper  
London Transport Planner  
Oyster Card App  
over 600 apps as of 2017...

**Toronto Transit Commission & Metro Linx**  
*Toronto, Canada*

**City Mapper  
Transit App  
Presto**

# Approaches to Consider

## Current Situation

- ▼ Individual Agency Apps
- ▼ GTFS is available for 3<sup>rd</sup> Party Apps
- ▼ Improving Data Quality

## IMI Approach

- ▼ Regional App
  - ▼ Initial Build
  - ▼ On-going maintenance
  - ▼ Security compliance
  - ▼ Accessibility compliance
  - ▼ Marketing
  - ▼ Report building
  - ▼ On-going data quality assurance
  - ▼ On-going feature development
  - ▼ Customer support

## Partnership Approach

- ▼ On-going GTFS data quality assurance
- ▼ Agreement with 3<sup>rd</sup> Party Provider covers all other items

# **Discussion of Desired Mobile App Features/Benefits**

# USER EXPECTATIONS of TRANSIT APPs

"I want to know if there was a disruption and **what are my alternatives.**"

"Want passengers to use your app? Then it has to **provide real-time data riders can rely on.**"

## Riders Want Forward-looking Information

Next three arrivals

Estimated walking time

Suggest alternatives

Seamless transfers

## Real-time Information is Valuable

**Easily accessible**

Riders value the ease of getting real-time information.

**Accuracy**

Correct real-time information, rather than arrival estimates, builds trust in public transportation and encourages ridership.

**Often used before trip**

64% of surveyed respondents check the arrival time of the bus or train before arriving at the bus stop or station.

**One-stop-shop sources**

Travelers prefer getting information in one place. 9 out of 10 survey respondents like using dynamic screens.

Mobility Lab, May 2, 2019 (<https://mobilitylab.org/research-document/market-research-on-real-time-transit-information-needs-and-users-expectations/>)

# IMI GRANT APP FEATURES

## ✓ 01 Multimodal Trip Planning

- Select Origin and Destination and see/select route on a map
- Plan trips across modes
- Plan trips across providers
- Specific travel preferences (e.g., wheelchair accessible)
- Estimate trip cost
- Compare time, cost, environmental impacts of route options
- Set up trip priorities (e.g., cheapest, fastest)

## ✓ 03 User Accounts

- Account creation (management and password reset)
- Store trip planner preferences and favorite locations
- Provide other personal details

## ✓ 02 Live Navigation

- Multiple language options
- Interactive map display (with pan/zoom)
- Share location, estimated arrival time, detailed directions with others
- Live route tracking (follow the bus or train)

## ✓ 04 Integration and Links to Mobility Partners and Fare Payment

- Sign in options to other accounts (e.g., Peach Pass, MARTA)
- Link to fare payment (e.g., Peach Pass or 3rd Party)
- Maps of nearby shared-mobility (e.g., bikes, scooters)
- Links to 3rd party app for calling/unlocking shared mobility
- Links to regional mobility (e.g., Georgia Commute Options)

## ✓ 05 Opportunity to Provide Customer Feedback

- User surveys
- Safety/Incident reporting
- Submit comments/feedback
- "Rate My Ride" pop ups

# Additional Considerations

- Technical Challenges
  - Populations without access to app and/or data plans
  - WiFi outages and low to zero reception on trains
  - Near Field Communication (NFC) – phone acting as contactless transport card or card reader
- Agency Coordination
  - Existing applications and future plans
  - Contract obligations
  - Data capabilities

# The Future of Transit Apps

## Short-Term

Agency App  
Coordination

Data Feed  
Continuity

## Mid-Term

Mobility as a Service  
(Plan, Pay, Go)

## Long-Term

Life Concierge  
App

Interoperability

Technology Disruptors

# Thank You.
